EXECUTIVE SUMMARY

A self-driven full-stack developer proficient in React.js, Node.js, MongoDB, and OpenAI API integrations, with hands-on experience building and deploying real-world applications — including an AI resume builder serving 50–200 users, a client-commissioned ERP system, and an intelligent e-commerce platform. V Dart's web development internship demands strong front-end skills, API proficiency, and a collaborative problem-solving mindset — qualities directly demonstrated across my project portfolio. Eager to contribute production-ready code and grow rapidly within a professional engineering team.

TECHNICAL SKILLS

Programming Languages: C, JavaScript (Advanced), Python, C++, java, Go Lang

Frontend: React.js, HTML5, Tailwind CSS

Backend & Runtime: Node.js, Express.js, Next.js, PHP

Databases: MongoDB, MySQL, Supabase

AI / ML & APIs: OpenAI API, Agentic AI (conceptual)

Tools & DevOps: Git, GitHub, Postman, DevOps (fundamentals), Vercel, Render, Docker, Kubernetes

SOFT SKILLS

Self-Taught & Fast Learner | Problem Solver | Team Collaborator | Adaptability | Attention to Detail

PROJECTS

AI Resume Builder *Tech Stack: React, Tailwind CSS, OpenAI API, <https://kscv.vercel.app/>*

- Engineered an AI-powered resume builder by integrating the OpenAI API with custom prompt engineering to generate ATS-optimized, role-specific resume content for 50–200 users.
- Designed industry-specific prompt templates to improve AI-generated resumes and ATS alignment. Built a real-time two-panel preview for instant formatting feedback, reducing iteration time. Implemented browser-based PDF export to create clean, ATS-friendly resumes.
- Deployed on Vercel with stable uptime, serving 50–200 real users with zero reported critical failures post-launch.
- Delivered a fully responsive interface ensuring consistent UX across desktop and mobile screen sizes.

AI-Powered Local E-commerce Platform *Tech Stack: React, Rule-Based AI, Supabase*

<https://univalut.onrender.com/>

- Built a full-featured multi-vendor e-commerce platform end-to-end as a college project, covering product listing, cart, checkout flow, and a shop owner management dashboard.

- Developed a rule-based AI product recommendation engine analyzing user browsing patterns to surface relevant products, simulating personalized shopping experiences.
- Designed a shop owner dashboard enabling local vendors to add, update, and manage listings — removing the need for any technical knowledge on the vendor's side.
- Implemented product search and multi-category filtering logic, enabling efficient item discovery across a growing multi-vendor product catalog.
- Delivered a fully mobile-responsive layout using Tailwind CSS, ensuring consistent usability across all screen sizes and devices.

Webinar Management System *Tech Stack: React, Tailwind CSS, Supabase* <https://web0211.vercel.app/>

- Sole developer — independently designed, built, and deployed a complete webinar management system from requirements to production as a portfolio project.
- Built an event scheduling module with validation, date/time handling, and localStorage support for managing multiple webinars. Developed attendee registration with event linking and capacity control. Created a real-time admin dashboard to track events, attendance, and live status in one place.
- Integrated a client-side notification and reminder system alerting registered users of upcoming webinar schedules, improving simulated attendee retention.

AC Duct ERP Management System *Tech Stack: React, Tailwind CSS, Firebase,mysql*

Client Project (Private — No Public Link) | Duration: 3–4 Months | Solo Developer

- Delivered a custom ERP system end-to-end for a real AC duct business client over 3–4 months — from client requirement gathering and UI design through to testing and handoff.
- Built a project and work order tracking module enabling the business to monitor active jobs, assign resources, and track completion status in real time.
- Created a client and vendor management module centralizing contact records, project history, and payment status — fully replacing the client's existing manual spreadsheet workflows.
- Designed a real-time business insights dashboard visualizing active projects, pending orders, and inventory KPIs — enabling faster, data-driven management decisions.
- Delivered a fully responsive web application accessible on mobile devices, allowing field staff to update job progress on-site without a desktop computer.

EDUCATION

Diploma in Computer Science Engineering (CSE) *May 2025 – Present*

GPA:9/10 (90%)

Seshasayee Institute of Technology, Trichy, Tamil Nadu

Higher Secondary (12th), Computer Science *Jun 2024 - Apr 2025*

Percentage:74%

Government Higher Secondary School, Guziliamparai,Dindigul, Tamil Nadu

CERTIFICATIONS

- Machine Learning Certification — October 2025
- AI Basics Certification — October 2025
- Google Core Python Certification — November 2025
- MAANG Developer Program — January 2026
- 5-Day Ai Agents Intensive Course(Google)— December 2025
- Artificial Intelligence 30day masterclass— November 2025 -December 2025
